

## **Social Contribution Activity Policy**

### **Social Contribution Activity Policy**

The mission of the Valuence Group is to encourage more people to focus on what is most important in their lives. To achieve this mission, we offer solutions to social issues through social contribution activities, and we support employee participation in these social contribution activities.

### **Areas of Focus**

The Valuence Group identified 18 ESG issues as materialities. We engage in social contribution activities focused on resolving these issues.

### **System**

The ESG Promotion Committee is responsible for overseeing social contribution activities and summarizing results. To incorporate the broadest range of opinions in our activities, we established a system for employees to participate voluntarily.
